

ZOMATO ECOSYSTEM SENTIMENT ANALYSIS

Dec 2025 – Jun 2026 | Enterprise Report

25,000+ Public Data Points · NLP Categorization · Power BI Dashboard

By Parthiv Prakash | VIT Vellore

[Google Play](#) · [App Store](#) · [Reddit](#) · [Twitter](#)

How I did this

01 Data Sources

25,000+ public reviews scraped from Google Play, App Store, Reddit & Twitter

02 Data Model

Star schema architecture built in Power BI for multi-dimensional analysis

03 NLP Engine

14 complaint categories via NLP categorization across all review text

04 DAX Measures

6 custom DAX measures for dynamic sentiment ratio & trend analysis

The Creep Nobody Noticed

Zomato's negativity didn't spike.
It crept up every single month.

59%

Dec 2025
negative

67%

Jun 2026
negative

A spike is a bad week.
A consistent upward trend
is a **structural problem**.

% Negative Reviews — Dec 2025 to Jun 2026

The #1 Problem Isn't Delivery

Everyone assumes delivery is Zomato's #1 problem.

25,000 reviews say otherwise.

#1 Customer Support

#2 Fulfillment & Logistics

#6 Ease of Use

The food arrives. The support doesn't.

Negative Reviews by Category

63.28%

of Zomato Gold mentions are negative

Their premium product is their most broken one.

Zomato Gold users pay for priority

63.28% express dissatisfaction

Premium promise is not being met

Why Is Gold Failing?

Gold users paid for priority.
They got the same broken
experience as everyone else.

#1 Premium/Gold Support Failures

#2 Speed of Delivery

#3 Agent Helpfulness

Zomato Gold needs a complete support overhaul.

Issues Behind Zomato Gold Dissatisfaction

3 Things Zomato Must Fix

01

Build a 24hr Support Resolution SLA

The product works. The recovery doesn't. Customer support is the single largest source of negative reviews — ahead of logistics and pricing. Fix the response loop.

02

Deliver on Gold's Promise — Or Redefine It

63.28% of Gold subscribers express dissatisfaction. Either enforce priority support, faster delivery & exclusive perks — or reposition Gold's value proposition entirely.

03

Stop the Trend Before It Compounds

59% → 67% negative sentiment in 6 months. This is a structural upward drift, not a seasonal blip. Intervention now costs less than crisis management at 80%.
